WORK EXPERIENCE

Snowflake

Software Engineer

June – Present

San Mateo, California

- Youngest software engineering intern at Snowflake, while contributing across multiple teams including Machine Learning, Data Marketplace, Data Modeling, and Data Query.
- Founding engineer on the Snowflake Notebooks team, playing a pivotal role in client and server-side engineering for this innovative ML + data analysis platform.
- Led full-stack development for the Terms and Conditions flow of the Snowflake Marketplace, streamlining the legal and user interface for a seamless user experience.

Neeva (acquired by Snowflake)

Software Engineer

May 2021 – May 2023

Remote

- Integral in the development and launch of a mobile browser application and an AI-driven search tool, achieving widespread acclaim with over 1000 5-star reviews within its first year.
- Led a critical four-month project to refactor the entire code base from UIKit to SwiftUI, resulting in a more robust and maintainable framework.
- Significantly increased the code base's automated test coverage to over 90% while concurrently reducing the average test run time by 50%, ensuring higher code quality and reliability.

Ferdasoft

Founder & Head of Engineering

Mar 2020 – May 2023

Portland, Oregon

- Founded and led the development of 'Nome - Music & Maps', a multifaceted application for iOS, WatchOS, CarPlay, and Web, recognized by the Apple App Store in "Our Favorites" and "Hot New Apps".
- Developed a unique turn-by-turn navigation algorithm integrated with a music system that builds a queue to end as you arrive at your destination, significantly enhancing user experience in real-time navigation.
- Managed all aspects of the business including software development, marketing, finance, and customer support, growing the brand and user base effectively.

TravSolo

Co-Founder & Head of Engineering

May – Sep 2021

New York, New York

- Co-founded and steered the development of a travel-oriented application, successfully securing over \$100,000 in funding through investor pitches and presentations.
- Oversaw the comprehensive development of the application across iOS and Web, ensuring a seamless user experience and robust functionality.

EDUCATION & AWARDS

NORTHEASTERN UNIVERSITY

BS, Computer Science & Economics

2023 – Present

- 4.0 GPA

APPLE SWIFT STUDENT SCHOLARSHIP

2022

- Developed innovative accessibility software, enabling device control through head and eye movements, using Swift, Vision, and CoreML.
