Awards

**Apple Swift Student
Scholarship 2022**

Invented novel accessibility
software using Vision and ML
that enabled motor impaired
users to control Apple devices
using only their head and eyes

Experience

Snowflake | Software Engineer

June 2023 - Present

- Continued my work from Neeva as an intern at Snowflake
- Implemented server-rendered Open Graph link images using Sharp while reducing image rendering times by over 75%
- Co-led frontend development on the Terms and Conditions flow for the entire Snowflake Marketplace
- Concurrently contributed to multiple teams across Machine Learning, Data Distribution, and Data Query

Neeva (Acquired by Snowflake) | Software Engineer

May 2021 - Present

- Worked on the development of the mobile browser application with over 1000 5-star reviews and an AI search tool
- Led a four-month initiative to refactor the code base from UIKit to SwiftUI
- Increased automated test coverage while reducing average run time by 50%
- Designed and built multiple browser extensions written in modern web frameworks for desktop and mobile Safari as well as Chrome

Ferdasoft | Founder & Head of Engineering

Mar 2020 - May 2023

- Founded a company and launched my self-developed app Nome - Music & Maps for iOS, WatchOS, CarPlay, and Web
- Engineered a turn-by-turn algorithm that could adapt to re-routes
- Featured on the Apple App Store for over one year, Product Hunt, and multiple media outlets

Trivory | Software Engineer & Designer

Jan 2023 - Present

- Created user-engagement and retention features for over 20k users across the entirety of Portland Public Schools
- Collaborated with the CEO on user interface design and iteration

TravSolo | Co-Founder & Head of Engineering

May 2021 - Sep 2021

- Raised over \$100,000 through multiple investors
- Took charge of application development across iOS and Web
