Awards

Apple Swift Student Scholarship 2022

Invented novel accessibility software using Vision and ML that enabled motor impaired users to control Apple devices using only their head and eyes

Experience

June 2023 - Present / Snowflake / San Mateo

Software Engineer Intern

- Implemented server rendered Open Graph link images using ImageMagick while reducing image rendering times by over 65%
- Co-led frontend development on the Terms and Conditions flow for the entire Snowflake Marketplace
- Seamlessly worked across three different ML, data distribution, and data query teams concurrently

Jan 2023 - Present / Trivory / Portland

Software Engineer & Designer

- Created user-engagement and retention features for over 20k users across the entirety of Portland Public Schools
- Collaborated with the CEO on user interface design and iteration

May 2021 - May 2023 / Neeva / Remote

Mobile Engineer

- Worked on the development of the mobile browser application with over 1000 5-star reviews and an AI search tool
- Led a four-month initiative to refactor the code base from UIKit to SwiftUI
- Increased automated test coverage while reducing average run time by 50%
- Designed and built multiple browser extensions written in modern web frameworks for desktop and mobile Safari as well as Chrome

Mar 2020 – May 2023 / Ferdasoft / Portland

Founder & Head of Engineering

- Founded a company and launched my self-developed app Nome - Music & Maps for iOS, WatchOS, CarPlay, and Web
- Engineered a turn-by-turn algorithm that could adapt to re-routes
- Featured on the Apple App Store for over one year, Product Hunt, and multiple media outlets

May 2021 - Sep 2021 / TravSolo / New York City

Co-Founder & Head of Engineering

- Took charge of application development across iOS and Web
- Developed chat, subscription, and location based features
- Raised over \$100,000 through multiple investors
