Education

Northeastern University
Computer Science & Economics
2023 - Present

Skills

Swift, SwiftUI, Combine
Vision, CoreML
React.js, JavaScript, TypeScript
Node.js, Golang
SQL, Python
Git

Tools

Xcode & Xcode Cloud
Figma
Docker
Adobe Suite

Awards

Apple Swift Student Scholarship 2022
Invented novel accessebility software using Vision and ML that enabled motor impared users to control Apple devices using only their head and eyes

Experience

Snowflake | Software Engineer

June 2023 - Present

• Continued my work from Neeva as the youngest intern at Snowflake
• Simultaneously contributed to multiple teams across Machine Learning, Data Distribution, Data Modeling, and Data Query
• Engineering on the client and server side for a new application enabling data querying concurrently in both SQL and Python
• Fullstack development on the terms and conditions flow for the entire Snowflake Data Marketplace

Neeva (Acquired by Snowflake) | Software Engineer

May 2021 - Present

• Worked on the development of the mobile browser application and an AI search tool from V0 to V1 with over 1000 5-star reviews
• Led a four-month initiative to refactor the code base from UIKit to SwiftUI
• Increased automated test coverage while reducing average run time by 50%
• Designed and built multiple browser extensions written in modern web frameworks for desktop and mobile Safari as well as Chrome

Ferdasoft | Founder & Head of Engineering

Mar 2020 - May 2023

• Founded a company and launched my self-developed app Nome - Music & Maps for iOS, WatchOS, CarPlay, and Web
• Engineered a turn-by-turn algorithm that could adapt to re-routes
• Featured on the Apple App Store for over one year, Product Hunt, and multiple media outlets

Trivory | Software Engineer & Designer

Jan 2023 - Present

• Engineering on platforms reaching over 20k users across the entirety of Portland Public Schools
• Worked with the CEO on design iteration, and experimental products

TravSolo | Co-Founder & Head of Engineering

May 2021 - Sep 2021

• Raised over $100,000 through multiple investors
• Took charge of application development across iOS and Web
